

Old Dominion Section
Century Club Scholarship

The Old Dominion Section of the American Society of Highway Engineers (ASHE) extends to all businesses and organizations an invitation to participate in an exciting part of our organization's support for education and the future of our industry.

Contributions from members of the Century Club provides funding for scholarships for engineering students who are studying highway industry related subjects at either J. Sargeant Reynolds Community College or John Tyler Community College . They must also meet the Old Dominion Section Engineering Scholarship Guidelines.

Membership in the Century Club not only provides for scholastic opportunities for engineering students, but will also provide your company with invaluable exposure to a wide audience within the transportation industry. To join the Century Club, we ask for a minimum annual contribution of only \$100, with any higher or lower contribution welcome.

If your company would like to be a member of the Old Dominion Section Century Club, please send \$100 (minimum) to our Treasurer at the address listed below. Checks should be made out to **Old Dominion Section Century Club**. We will arrange to obtain your company logo for future publicity and display on our web site.

Thanks very much to those shown their support and interest in helping engineering students in the Commonwealth and our organization's goals!
